BRAND IDENTITY & ASSET STANDARD · 1:1 MOBILE APP ICON ARCHITECTURE

TT: Student Timetable — Official Logo Specification & Style Guide

Official Master Logo (1:1 Aspect Ratio): Dual Brand Indigo “TT” monogram (`#4F46E5`), intersecting Crisp White check-in stroke (`#F8FAFC`), 6×7 inner timetable matrix (`#334155`), and permanent radial outer net grid (`#1E293B`) on a Deep Slate canvas (`#0F172A`).

1. Logo Philosophy & Concept

The **TT: Student Timetable** logo is a unified geometric emblem that communicates precision, structure, and reliability at a single glance. Rather than using literal cartoon metaphors (such as alarm clocks or graduation caps), the mark integrates four inseparable structural layers into a single cohesive logo:

- **The Dual “TT” Monogram:** Represents **T**ime**t**able. Both the left and right capital “T” letterforms are rendered in solid Brand Indigo (`#4F46E5`) with bold, uniform stroke weights.
- **The Integrated White Check-In Stroke:** A crisp white (`#F8FAFC`) completion checkmark cuts cleanly across the right “T” stem at a 45° upward angle—separated by sharp negative-space channels—symbolizing attendance and task completion.
- **The Primary Timetable Matrix:** Framing the monogram is a 6-column by 7-row paper-timetable grid (`#334155`) featuring solid header blocks along the top axis (days) and left vertical axis (time slots).
- **The Outer Architectural Net Grid (Integral Perimeter):** Extending outward around the 6×7 timetable matrix is a finer, secondary micro-grid (`#1E293B`) that forms a radial net halo around the emblem. This outer net is an official, permanent part of the logo itself—not merely a background decoration—anchoring the mark with the look of precision drafting paper.

- **Zero-Outline Geometry:** Every plane of the “TT” letterforms and the checkmark is constructed without outer borders or strokes, keeping the silhouette razor-sharp across screens and print.

2. Logo Anatomy & Elements

Logo Element	Structural Role	Visual Treatment
Dual “TT” Letterforms	Primary typographic core	Solid Brand Indigo (`#4F46E5`), flat geometric cuts
Integrated Checkmark	Action & completion focal point	Solid Crisp White / Slate (`#F8FAFC`), 45° upward terminal
Negative-Space Cutoffs	Separates the checkmark from the right “T”	Clean diagonal channels that preserve letter legibility
Inner Timetable Matrix	Core structural frame (6×7 grid)	Muted Slate grid lines (`#334155`) with top and left header blocks
Outer Net Grid (Part of Logo)	Integral radial micro-grid perimeter	Fine subdivision mesh (`#1E293B`) radiating outward from the 6×7 grid
App Icon Canvas	Houses the complete mark	Deep Slate (`#0F172A`) squircle or square surface

3. Logo Color Specification

The logo uses a focused palette engineered for high contrast across light, dark, and print surfaces.

Component	Color Name	Hex Code	RGB Values	Usage in the Logo
Dual “TT” Monogram	Brand Indigo	`#4F46E5`	79, 70, 229	Both Left and Right “T” stems and crossbars
Luminous Brand Accent	Dark-Mode Indigo	`#818CF8`	129, 140, 248	Optional highlight variant for small dark-surface badges
Check-In Stroke	Crisp White / Slate	`#F8FAFC`	248, 250, 252	Integrated upward checkmark intersecting the right “T”
Inner Timetable Matrix	Muted Slate	`#334155`	51, 65, 85	Main 6×7 timetable grid and axis header blocks
Outer Net Grid	Subtle Slate Net	`#1E293B`	30, 41, 59	Integral fine mesh grid radiating around the 6×7 matrix
Logo Canvas (Dark)	Deep Slate	`#0F172A`	15, 23, 42	Primary dark surface behind the unified logo

4. Black & White (Monochrome) Renditions

When full-color reproduction is unavailable—such as single-ink screen printing, laser engraving, embossing, or monochrome documents—the entire unified mark (including the inner 6×7 grid and outer net grid) renders in single-channel monochrome:

- **Positive Monochrome (Black on White):** The “TT” monogram, checkmark, inner 6×7 timetable grid, and outer net grid render in Black (`#000000` or `#0F172A`) on a pure White (`#FFFFFF`) background. The outer net grid uses a fine hairline weight (or 20% opacity tone) while the diagonal negative-space channel around the checkmark remains open.
- **Negative Monochrome (White on Black):** The monogram, checkmark, inner 6×7 grid, and outer net grid invert to pure White (`#FFFFFF`) on a solid Black (`#000000` or `#0F172A`) background, maintaining the exact same negative-space cutoffs and line-weight hierarchy between the inner matrix and outer net.

5. Logo Lockup Typography

When the logo is paired with the product name in horizontal or stacked lockups (such as store banners, headers, or complimentary cards), use **Inter** to match the geometric precision of the “TT” monogram:

- **Primary Lockup Typeface:** Inter Bold (700) for **“TT”**, paired with Inter SemiBold (600) or Medium (500) for **“Student Timetable”**.
- **Alignment with the Outer Net:** Measure lockup spacing from the outer boundary of the net grid so typography never overlaps or crowds the radiating mesh lines.
- **Tracking:** Set all-caps lockup headers (`TT: STUDENT TIMETABLE`) with +4% to +6% letter spacing for clean geometric balance.

6. Spacing, Clear Space & Minimum Scale

Clear Space (Measured from the Outer Net Boundary)

Because the outer net grid is an integral part of the logo, the logo's bounding box encompasses the full radial extent of the outer net:

- **Minimum Clear Space:** Maintain a clear margin outside the outer edge of the net grid equal to **15% of the total logo width** (or the width of one vertical “T” stem).
- **Isolation Rule:** No text, UI borders, or secondary graphics may cross into the outer net grid.

Scale Variants & Minimum Sizes

- **Master Logo (Monogram + Checkmark + 6×7 Matrix + Outer Net Grid):** The default, primary logo. Use across all placements **48 × 48 px and above** (App Store/Play Store icons, splash screens, apparel, complimentary cards, tote bags, and print).
- **Micro QR Badge (16 × 16 px to 44 × 44 px):** Only when embedding inside the tiny center module of a QR code where sub-pixel grid lines cannot physically resolve, use the compact core mark so camera scanners read the code instantaneously.

7. Light Surface vs. Dark Surface Logo Application

To ensure the outer net grid, inner 6×7 matrix, Indigo “TT”, and checkmark remain crisp across every environment, two official 1:1 SVG mobile app icon masters are provided:

- **Dark Mode SVG Master (`#0F172A` Deep Slate Canvas):** Places the full Master Logo—Indigo “TT” (`#4F46E5`), Crisp White checkmark (`#F8FAFC`), Muted Slate 6×7 timetable matrix (`#334155`), and Subtle Slate outer net grid (`#1E293B`)—directly on the dark canvas with a radial vignette mask.
- **Light Mode SVG Master (`#F8FAFC` Light Slate Canvas):**
  1. **Contained Squircle Badge (App Headers & Store Icons):** Houses the dark Master Logo inside its `#0F172A` Deep Slate squircle container so the subtle net and white checkmark retain 100% contrast.
  2. **Native Light-Mode Canvas Variant (Provided in Light SVG):** Renders directly on a `#F8FAFC` light canvas with the dual “TT” in Brand Indigo (`#4F46E5`), the checkmark in Deep Slate (`#0F172A`) with a crisp `#F8FAFC` negative-space channel, the inner 6×7 matrix in Mid Slate (`#94A3B8`) with `#CBD5E1` header blocks, and the outer radial net grid in Light Slate (`#CBD5E1`).

> **Mobile App Icon Aspect Ratio Standard:** Both official `.svg` files are built on a strict **1:1 square viewBox (`0 0 1024 1024`)**, ready for direct export to Apple App Store (`1024 × 1024 px`), Google Play Store (`512 × 512 px`), and Expo/React Native adaptive icon assets.

8. Logo Misuse Rules (What Not to Do)

- **Never Crop Out the Outer Net Grid:** The smaller net grid surrounding the main 6×7 timetable matrix is part of the logo; do not trim flush against the 6×7 box in standard placements.
- **No Outlines or Strokes:** Never add an outer stroke or border around the “TT” letters or the checkmark.
- **Never Overpower the Inner Matrix:** The outer net grid must always remain finer in line weight and softer in contrast than the inner 6×7 timetable grid.
- **No Color Swapping:** Never use red (`#DC2626`) or green (`#16A34A`) inside the logo mark.
- **No Stretching or Skewing:** Always scale the complete logo (including the outer net) proportionally (1:1 aspect ratio).

9. Logo Asset & Mockup Specifications

Application / Mockup	Dimensions / Format	Logo Variant & Placement
Master Standalone Logo (Dark & Light)	`1024 × 1024` viewBox (SVG, 1:1)	Full Master Logo (Indigo TT, Checkmark, 6×7 Matrix + Outer Net Grid)
Apple App Store Icon	`1024 × 1024 px` (PNG/SVG, 1:1)	Full Master Logo centered on `#0F172A` or `#F8FAFC` canvas with outer net intact
Google Play Store Icon	`512 × 512 px` (32-bit PNG/SVG, 1:1)	Full Master Logo centered on adaptive 1:1 canvas
Apparel (T-Shirts & Tote Bags)	Vector SVG / EPS (Halftone/4-Tone)	Full Master Logo including the outer net grid printed on deep navy fabric
Complimentary Cards	`3.5 × 2 in` (300 DPI CMYK/Spot)	Full Master Logo with outer net grid on matte `#0F172A` cardstock
Die-Cut Stickers & Swag	Vector Cutline (`3 × 3 in`)	Rounded square or circular dark-slate badge preserving the full outer net grid
Insulated Water Bottles	Vector SVG (Laser Etch)	Negative Monochrome Master Logo (including fine outer net) on matte cylinder
